

WARPED

THE LIES THEY TELL YOU

DON'T BE FOOLED

We are a smart people. Very smart, it's true. There is no one smarter than us. Not even the Vulcans, and they are pretty smart.

But we outsource our talent to other worlds, give them access to our inventions and get nothing in return!

THE PATH FORWARD STARTS IN THE DARK

We have been told we need the others.

But do we?

Why import plomeek soup if we have our own selection of delicious dishes?

Why produce our inventions on lesser worlds?

Starfleet fears the Blackout - but what if it's a blessing?

ECONOMIC PATRIOTISM

01

Earth soil, Earth sun, Earth water - nobody grows and invents like we do. The Andorians? They grow ice. Vulcans? Dust farms. Sad!

02

With the Blackout, we bring business back to Earth. No more shipping in overpriced Talaxian fruit. Warp travel's down? Good! Keep Earth money on Earth.*

03

The Blackout is a blessing. A forcefield around greatness.

*Legal Disclaimer: There is no actual money involved.

VULCAN

A stylized illustration of the Earth and the Moon against a black background. The Earth is a large sphere on the left, showing continents in shades of green and yellow and oceans in light blue. The Moon is a smaller sphere at the bottom center, covered in dark grey craters. The text is positioned to the right of the Earth.

MAKE EARTH GREAT AGAIN

KEEP THE LIGHTS OUT SO THE LIGHTS IN OUR PRODUCTION
FACILITIES STAY ON.
